Internship

Summer Intern | GPCSSI-25(Gurugram Police CyberSecurity Summer Internship) Jun'25–Jul25

- Assisted law enforcement in real-world cybercrime investigations during an internship, applying OSINT, digital forensics and log analysis to support evidence collection and incident understanding.
- Conducted hands-on exploration of AI-Security concepts, cyber laws, and forensic workflows through lab visits and case simulations.
- Contributed to public cyber awareness initiatives as part of cyber warrior outreach.

Cipher School's | EduTech Company Jun'25 – Jul'25

Data Structure and *Algorithms with C++*

- Completed an intensive program covering C++ fundamentals, OOPs, STL, and advanced DSA.
- Developed a Library Management System using C++ and DSA concepts as a project, focusing on file handling and data structures.

Projects

Active Directory & SOC Monitoring Lab |Windows Server, Splunk, Forwarder, Sysmon Feb'26-Mar26

- Configured windows Active Directory Domain Controller and managed user accounts and group policies.
- Integrated Windows Event Logs with Splunk for centralized log monitoring and analysis.
- Created detection queries for failed login attempts, account lockouts, and suspicious authentication behavior.
- Simulated attack scenarios to analyse authentication logs and investigate security events and documented incident findings and response workflow.

Library Management System | C++, OOPs, File Handling, Data Structures and Algorithms | Github Jun'25–Jul'25

- Designed a menu-driven library system for managing books, users, and transaction management.
- Implemented file handling for persistent storage and data structures like linked lists, maps, stacks, Queues to optimize performance.
- Incorporated error handling, input validation and modular design to ensure system reliability and Scalability.

IP Scanner | Python, Geo-IP APIs, OpenStreetMap API, OSINT Framework | Github May'25 – Jul'25

- Developed a Python-based CLI tool to scan and analyze multiple IP addresses concurrently for OSINT and threat intelligence.
- Automated fetching of geolocation, ISP/ASN, and network data, reducing manual analysis time 40% and export results to .CSV file for reporting and analysis.
- Incorporated reverse geocoding and threat-intel integration to identify potentially malicious suspicious Ips efficiently by 60%.

Certificates

Fortinet NSE – 1 | Fortinet	Feb'26
Advent of Cyber 2025 | TryHackMe	Dec'25
Data Structure and Algorithm with C++ | Cipher School's	Jul'25
Advent of Cyber 2024 | TryHackMe	Dec'24
Google Cybersecurity Professional | Coursera	May'24

Technical Skills

Languages: C++, Python, C, Java, Bash Scripting, SQL

Security Tools : Splunk, Wireshark, Nmap, Burpsuite, Nessus, OpenVas, CyberChef, Recon-ng

Technologies/Frameworks: OSINT, Wireshark, Nmap, Windows System Administration, Linux(Ubuntu), Active Directory

Skills: Documentation, Team Coordination, Problem-Solving, Analytical Thinking, Ethical Responsibility

Achievements

- Ranked Top 1% globally on TryHackMe among 4M+ users, showcasing strong analytical thinking and hands-on technical problem-solving skills. Jan'26
- Actively participated in National Service Scheme (NSS) camps, contributing to community development, teamwork, and social responsibility initiatives. Jan'26

Education

Lovely Professional University Since **2023**
Computer Science and Engineering *Jalandhar, Punjab*

B.S.R Junior College **2021 – 2023**
12th with Science — Percentage: 94% *Tirupathi, Andhra Pradesh*

Balaji High School **2020 – 2021**
10th with Science — Percentage: 98% *Kadapa, Andhra Pradesh*
